

MODULAR C3 TOUCH-FREE SOAP DISPENSER

Touch-free soap dispensing encourages better hygiene in any environment and helps monitor the use by controlling the amount of soap dispensed. No electrical fitting is required, as each dispenser is economically operated by C size batteries. It also features an auto-switch function between two battery compartments for longer running times. To ensure optimum cost savings, the device has a 'sleep mode' and a capacitive sensor that prevents accidental soap delivery.

KEY FEATURES
